DUTCH PILOTAGE

The coast of The Netherlands is shaped by rivers, currents, wind and is subject to constant, unpredictable changes. No one is capable of knowing the entire coast and all the estuaries. Besides, no one is capable of keeping that knowledge continuously up to date. For this reason a maritime pilot in The Netherlands specialises in one particular district only. From south to north we distinguish the districts: River Scheldt, Rotterdam-Rijnmond, Amsterdam-IJmond and North.

Pilots offer their services to all incoming and outgoing vessels irrespective of type and size. It is their aim to ensure a safe and quick passage of vessels to, through and from the various ports in The Netherlands and Belgium as well as to safeguard the interests of the environment.

By offering these services on a 24/7 basis, the pilots are able to meet the demands for permanent access and "just in time" delivery. Pilot vessels at sea are manned on a permanent basis and fast launches and a helicopter are used to (dis)embark pilots round the clock. When normal pilotage is suspended, "Shore Based Pilotage" is offered to smaller vessels and pilots for larger vessels can be (dis)embarked by helicopter as an extra service. In other words, by making use of the services offered by the Dutch Pilots' Organization, an undisturbed approach of the Dutch Ports will be guaranteed.

RATES 2011

This booklet contains the pilotage dues for 2011 applicable to the North district (Delfzijl and Eemshaven area, Harlingen and Terschelling area). These charges are all in Euro. Pilotage dues are established by the NMa (Netherlands Competition Authority), according to a fixed tariff structure. Should you have any questions concerning these dues, please contact our office. The addresses can be found on the back of this booklet.
